

Before printing, make sure scaling is set to "none"

Check print output with ruler to match 2 inches exactly.

- What's a good fit: A ring should wrap around your finger in the way that it neither too tight nor too loose. Make sure you can slide it over your knuckle without difficulty, but also make sure that it won't slip over your knuckle by itself. Ring size are usually determined by the base of your finger. If your knuckle is a lot larger than the base of your fingers, you should select a size that is between the base of your finger and your knuckle. You can find your size using method A with a non-stretchy string or method B with the cut-out sizer.
- It is best to measure your finger at the end of the day during warm temperatures. Your fingers change size throughout the day and in different temperatures, you should always size a ring at your most comfortable zone.

PLEASE CAREFULLY READ ALL INSTRUCTIONS FOR PROPER FITTING.
PLEASE CHOOSE FROM FOLLOWING METHODS BELOW

METHOD A - STRING SIZER

Use a non-stretchy string as described above and match the length below

METHOD B - RING SIZER

READ THE SIZE HERE ← cut the slit

5 6 7 8 9 10 11 12 13

1. Cut out the ring sizer on the left
2. Slip the pointed end through the slit
3. Wrap the sizer around the base of the finger and the knuckle to take the ring size measurements.
4. Make sure to pull tightly

METHOD C - USING EXISTING RING

Size 5 Size 6 Size 7 Size 8 Size 9 Size 10 Size 11 Size 12 Size 13

Place the existing ring over the circles above, match the inside of the ring to the outside of the circle. If the ring is between two sizes, it would be best to order the larger size.
